Services

Consulting on nutrition, selection, facilities and reproduction

\$1,000.00 US per working day for one person

- visas, airfare, ground transportation, accommodations and meals are in addition to professional fees and are the financial responsibility of the client(s)

Insemination/Implants (on more than 500 inseminations, costs are quoted individually)

- \$2,000.00 US per working day for a two-person team consisting of a veterinarian and a technician and the use of our equipment
- visas, airfare, ground transportation, accommodations and meals are in addition to professional fees and are the financial responsibility of the client(s)

Program drugs, supplies and consumables are in addition to professional fees and can be supplied. These will be quoted individually as costs and shipping expenses can vary considerably. An average estimate for these costs (at current prices) is \$25.00 per ewe for artificial insemination.

All export and shipping costs are in addition to the above.

Payment schedule

- A deposit of 30% of professional fees and embryos/semen is required at the time the contract is signed
- A second payment of an additional 30% is due once collection of embryos/semen has begun
- A third payment of another 30% is due before tank with embryos/semen is shipped
- The final payment is due upon arrival of the tank in the receiving country
